

Faiyaz Sabab

Data Analytics • Business Intelligence • Process Optimization

6001573844 — sababfaiyaz25@gmail.com — linkedin.com/in/faiyaz-sabab-0925-cse

Summary

Analytically driven Analyst with expertise in data analytics, business intelligence, and scalable process optimization. Skilled in SQL, Python, and Power BI with hands-on experience in dashboard creation, workflow automation, data validation, and generating actionable insights from large datasets using visualization tools.

Experience

upGrad - School of Technology

Oct 2025 – Present

Analyst – Growth and Strategy

Bengaluru, KA

- Analyzing acquisition, retention, and revenue metrics to support strategic growth initiatives.
- Building dashboards to track funnel conversion, campaign performance, and ROI.
- Performing cohort analysis and forecasting for GTM opportunities.
- Collaborating with marketing, product, and sales teams to improve lead lifecycle efficiency.

TekWissen Software

Nov 2024 – Sep 2025

Jr. Program Coordinator

Visakhapatnam, AP

- Managed Ceipal HRMS systems and optimized ATS sourcing pipelines.
- Created workforce analytics dashboards using Power BI.
- Maintained Azure SQL databases and validated structured/unstructured datasets.
- Coordinated with clients including Amazon, Unisys, ThermoFisher Scientific, Lonza, and PG&E.

Indian Oil Corporation Limited

Aug 2023 – Sep 2023

Summer Intern

Digboi, AS

- Developed ANPR system using YOLOv8 and EasyOCR for automated vehicle authentication.
- Improved authentication and process efficiency by 90%.

Projects

Assamese to English Translator (Transformer-based)

- Built a sequence-to-sequence bilingual NLP model using Transformer architecture based on attention mechanisms.
- Preprocessed large bilingual datasets, tokenized sequences, and optimized GPU training pipelines.
- Performed real-time model evaluation and validation using TensorFlow.

Real-Time Facial Recognition Attendance System

- Developed end-to-end attendance automation system using OpenCV, Python, Flask, and SQL.
- Integrated TensorFlow, Haar Cascade classifiers, and MediaPipe for facial detection.
- Automated periodic data fetch and report generation in JSON and Excel formats.

Skills

- **Programming & Querying:** Python, SQL, C/C++, HTML, CSS, JavaScript
- **Data Engineering & Tools:** Pandas, NumPy, Spark, Hive, Athena, Scikit-learn, Matplotlib
- **Software & Technologies:** Git, TensorFlow, Power BI, Tableau, Looker Studio

Education

Assam Science and Technology University

2020 – 2024

Bachelor of Technology, Computer Science

Kendriya Vidyalaya

2008 – 2020

Science PCM

Certifications

- Data Analysis & Power BI - Tutedude
- Business Analysis - Microsoft & LinkedIn
- Prompt Engineering & Generative AI - LinkedIn
